## Cél:

A Szigetközi térség kiválasztott ökoszisztemája szolgáltatásainak értékelése jellemző időszakokra, a vízpótlórendszerek hatásainak bemutatása érdekében.

Ökoszisztemája szolgáltatás	Referencia 1950-1990	Elterelés 1993-1994	Vízpótlás 2015-2025
Szántóföldi növénytermesztés hozama (E)	x	x	x
Gyepterületek hozama (E)	x	x	x
Erdőterületek növekménye (E)	x	x	x
Üvegházhatású gázok megkötése (SZ)	x	x	x
Élőhelyek biztosítása (SZ)	x	x	x
Halállomány – horgászat, halászat (K, E)	x	x	x
Vízhez kötődő rekreáció (K)	x	x	x
Árvíz szabályozás (T)	x	x	x

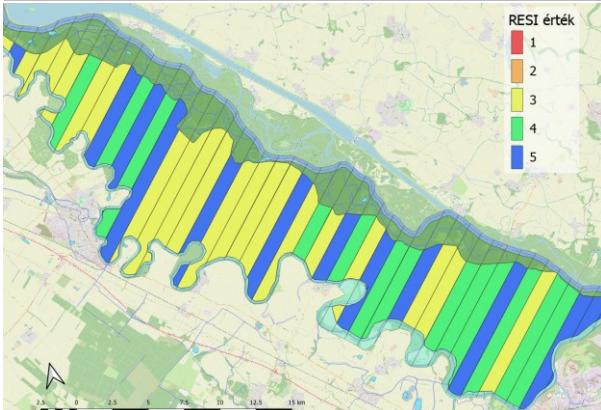

Funded by the European Union. Views and opinions expressed are however those of the author(s) only and do not necessarily express those of the European Union or the European Research Executive Agency (REA). Neither the European Union nor the granting authority can be held responsible for them.

## Milyen eredményeket szolgáltat a RESI?

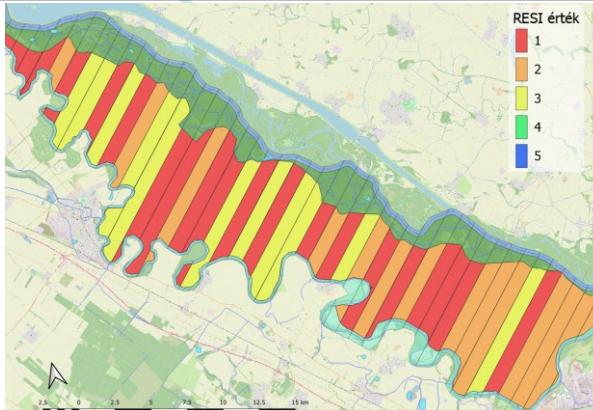

Pl. egy adott – a mentett oldalon értelmezhető – ökoszisztemája szolgáltatás értékelése a RESI módszertanban meghatározott index alapján 3-5 közötti osztályzatról 1-3 közé romlott, majd a vízpótlás hatására 2-5 közé javult.

## Összefoglalás

A Felső-Szigetközben (A szelvény) a talajvízsint visszapötlés a téli félévben 0 közeléi, vagy akár negatív is lehet.

A Közép-Szigetközben (B, C szelvény), a vegetációs időszakban (Q2-Q3) a talajvízsintcsökkenés 1/3-a visszapótolt. Télen a teljesítmény rosszabb.

Az Alsó-Szigetközben (D szelvény) a talajvízsint a téli félévben számottevően, nyári félévben csekély mértékben javult, vagy romlott.

Funded by the European Union. Views and opinions expressed are however those of the author(s) only and do not necessarily express those of the European Union or the European Research Executive Agency (REA). Neither the European Union nor the granting authority can be held responsible for them.

Köszönöm
